**1. Definition**

A drug-endangered child (DEC) is a child who has been exposed to an environment with conditions of contamination or hazardous life style that result in abuse, life or health endangerment, or neglect perpetrated on the child as a result of illicit drug use, sales, or manufacturing. A criminal violation threshold is met when elements of the contamination or hazardous life style meet the criteria of Kansas Statutes. A child is defined as a person under the age of 18 years. Contamination is defined: Contamination caused by the "cooking" and disposing of Meth hazardous chemicals inside a home endangering children by affecting: floors, walls, ceilings, working surfaces, furniture, carpeting, paneling, wallpaper, draperies, blinds, light fixtures, kitchen appliances, plumbing fixtures and drains, vent fans, ceiling fans, heating and air-conditioning vents, clothing, toys, food, etc. Contamination outside the home resulting from the dumping or burning of waste on or near soil, surface water, groundwater, sewer or septic systems.

**2. Introduction**

Clandestine methamphetamine manufacturing and distribution has created a public health and safety crisis for the residents of Kansas. Despite increased law enforcement efforts, methamphetamine manufacturing continues to grow at an alarming rate. Chemicals used in the manufacture of methamphetamine and other illegal drugs can be poisonous, corrosive, carcinogenic, flammable, and/or explosive. The drugs and chemicals present in methamphetamine and other drug labs are often easily absorbed by the body and/or breathed in as vapors. These chemicals often contaminate items in their vicinity, which can result in the need for disposal of contaminated items such as carpeting and furniture to ensure the remediation of a hazardous environment. The risk to children at these locations is extremely high. Steps have been taken in McPherson County to address the needs of these children who have been found in meth labs in McPherson County. The following protocol sets down in writing the McPherson County Agency-by-Agency approach to addressing this problem.

**3. Mission**

The mission of the Drug Endangered Children Task Force is to identify and protect drug endangered children and to identify, provide, and continue services to them utilizing the criminal justice system, law enforcement, child welfare, and other community agencies with the goal of continuing to improve outcomes for these children. The program also seeks to deter methamphetamine production in the presence of children by arresting and prosecuting all manufacturers and their accomplices who manufacture methamphetamine in a manner that endangers children.

**4. Purpose**

In the interest of protecting children found in or near methamphetamine laboratories, the Drug Endangered Children Task Force project has developed a multi-agency cooperative effort involving the Kansas Bureau of Investigation, the Drug Enforcement Task Force, the Kansas Attorney General's Office, the McPherson County Attorney's Office, Social and Rehabilitation Services, the McPherson County Sheriff's Department, and all county/city Police Departments, McPherson County Emergency Medical Services, Juvenile Intake and Assessment, and McPherson County Health Agencies to address drug-endangered children's' issues. These agencies will continue to work in a collaborative effort to facilitate a coordinated response to promote the health and safety of children found in methamphetamine laboratories or places where drugs are kept or sold.

**5. Project Goal**

The primary goal of the DEC Task Force is to establish a multi-agency methodology for the appropriate diagnosis and treatment of children who have been exposed to the chemicals used to manufacture methamphetamine or other illegal drugs in a clandestine laboratory setting, and to prosecute all individuals responsible for endangering children. Appropriate diagnosis and early treatment are imperative so that the psychosocial and physical needs of these children are effectively addressed.

## McPherson County DEC Protocol and MOU

DEC member agencies will work closely together to improve the relationship and cooperation between organizations and to train local law enforcement agencies in the successful DEC case investigations and response. Statistical information is kept by both the McPherson County Attorney's Office and SRS in order to establish a data base for tracking these children, the services provided, and case outcomes.

The McPherson County DEC Task Force will utilize a multi-disciplinary approach to best meet the needs of drug endangered children and enhance cooperation through a collaborative effort involving all agencies who participate as needed: law enforcement, SRS, emergency medical services, mental health, and prosecution. If any of the children become dependants of the Juvenile Court through C.I.N.C. proceedings, SRS will recommend an appropriate treatment plan and suitable placement of the children as required.

### **6. Exchange of Information Between Agencies**

All law enforcement agencies, within McPherson County, will exchange verbal and written reports, with SRS, as deemed necessary for the completion of assuring the safety of drug affected children. For law enforcement, the reports will include the Standard Offense Report and the accompanying narrative report.

SRS will provide law enforcement with any appropriate, relevant information received during the course of their Family Based Assessment.

These forms will include the CFS (Children and Family Services) 1000, 1001, 1002, and the CFS 1010, which contains all narrative information.

Information gathered by Juvenile Intake and Assessment will be faxed to the SRS office as soon as the documents are completed.

## McPherson County DEC Protocol and MOU

All interviews, by all agencies, will be documented and provided to each other in an expedited manner.

The same reports will be provided to the McPherson County Attorney's Office.

### 7. **Reimbursement/Expense**

In the event of potential contamination of clothing, charity organizations will be sought out for donations to the identified children in need. It is the expectation that children be properly clothed before being transported to designated emergency placement.

The designated point of contact for these agencies will be 911 as they have a listing for after hour's numbers and contacts.

As is dictated by SRS policy, all law enforcement protective custody placements of children are funded by SRS.

### 8. **Agency-by-Agency Protocol Approach**

#### a. **Law Enforcement**

If law enforcement personnel at the scene determine that the child(ren) has been exposed to any level of contamination, they shall make arrangements for transport of the child(ren) to the nearest medical facility for further examination. Juvenile Intake will be immediately called in and take charge of the child(ren). Fire/EMS, will decontaminate the child(ren) at the scene prior to transporting the child(ren). If it is determined at the scene that the child(ren) has not been exposed to any level of contamination, the child(ren) will be referred to Juvenile Intake and Assessment. An officer will work with SRS in interviewing the child(ren) and getting them the help needed. Reports are made by law enforcement to support a C.I.N.C. case. Evidence is documented, photos taken and reports are made in reference to the condition of the home, any exposures etc. This should be sufficient to show endangerment of a child.

## McPherson County DEC Protocol and MOU

All relevant evidence will be collected by or transferred to law enforcement and maintained by the KBI, the local Police Department, or the McPherson County Sheriff's Office.

The law enforcement officer will ensure that contact is made with Juvenile Intake, who will in turn contact the designated McPherson SRS officer (Director of Child Protection Services).

The investigating officers assigned to the case, and the McPherson County Drug Task Force if involved, will conduct the preliminary interviews of witnesses and parents at the scene whenever possible, and at their earliest opportunity if not at the scene.

The interview of the parents, witnesses, and child will have a three-prong purpose: possible criminal charges on the parents, possible child in need of care procedures on behalf of the child, and medical needs of the child.

If law enforcement personnel at the scene determine that the child has been exposed to any level of contamination, they shall make arrangements for transport of the child to the nearest Medical Center for further examination. Law enforcement will contact Fire/EMS, to decontaminate the child at the scene prior to law enforcement transporting the child to nearest Medical Center. If it is determined at the scene that the child has not been exposed to any level of contamination, the child may then be referred to Juvenile Intake for determination of temporary placement or the nearest Medical Center for subsequent medical examination of the child.

### **b. Emergency Medical Services**

## McPherson County DEC Protocol and MOU

If necessary, the appropriate EMS agency in McPherson County will be dispatched to respond to methamphetamine or other drug laboratories where children are present. If suspected exposure, contact the appropriate fire service and law enforcement agency as soon as possible. If children are contaminated, the fire service, prior to assessment by EMS personnel will decontaminate them. The appropriate field treatment will be provided by EMS and if indicated, transport made to the nearest appropriate hospital for further assessment and treatment. At the request of law enforcement, the hospital medical records department will make available EMS and ED records for trial purposes. When applicable, law enforcement will provide a statement of services from the responding emergency medical service to the prosecutor for consideration of financial restitution.

### **c. Fire Departments**

The McPherson Fire Department has a Hazardous Materials Response Team that is available to all Fire / EMS/ and Law Enforcement Agencies in McPherson County. When requested, the Haz-Mat Team will respond to the scene of an incident, or to a treatment facility to decontaminate affected children and adults. Also when requested, the Haz-mat Team will evaluate the structure(s) where the children are living to determine if decontamination of the structure is needed. The Haz-mat Team will work with local and state health officials to determine if the structure is safe to re-inhabit. The Haz-Mat Team or local fire department is not responsible for the cleanup of a contaminated site but may assist in the cleanup under certain conditions and can charge the responsible party for costs associated with mitigating the hazards under federal law.

Depending upon the location of the incident, the volunteer Fire Departments located outside of the City of McPherson and within McPherson County may be requested to respond to the scene and provide gross decontamination (washing the victim down with a small fire hose). However, it is recommended to contact the Haz-Mat Team for most decontamination needs, (gross and secondary washes,

## McPherson County DEC Protocol and MOU

decon solutions, on site personal showering, changes of clothing, collection of contaminated clothing, etc.)

In the event that the Fire Departments in McPherson County are the first agency to identify the drug endangered child, the Incident Commander will immediately notify local law enforcement and EMS. If necessary and if requested by law enforcement Fire Department will notify local SRS authorities and initiate the decontamination process.

### **d. Health Agencies**

Scene Triage by EMS:

- ⇒ No need for immediate care. Child goes into protective custody. A baseline exam is performed in the physician's office within 24-48 hours.
- ⇒ Need for immediate care. Transport to nearest appropriate facility according to current transport guidelines.

Children that require immediate medical evaluation and treatment will be taken to the nearest appropriate facility unless directed to one of the local physician clinics. Upon arrival the staff will evaluate the child. The Emergency Department staff as indicated by the individual patient's needs will determine the appropriate treatment and testing.

Medical Records will be maintained by facility utilized.

When evaluation and treatment is completed the child will either be admitted to the hospital for further treatment or discharged to protective custody depending upon their condition. If discharged to protective custody, that agency will arrange for a baseline evaluation in a physician's office in 24-48 hours and any further follow-up that is needed.

## McPherson County DEC Protocol and MOU

### **Preservation of evidence:**

All relevant evidence will be collected by or transferred to law enforcement and maintained by the KBI, the local Police Department, or the McPherson County Sheriff's Office.

The funding source for comprehensive physical exam and any required testing has yet to be identified. Exams related to assessments of abuse and neglect is typically funded by SRS/Medicaid or Family Services Funds.

Each supporting agency will share documents according to current agency protocols, policies and procedures. Forms and documents will be completed and submitted at appropriate times to appropriate agencies as current policy dictates.

### **e. Juvenile Intake**

Notification – Whenever a child is found in a methamphetamine or other drug laboratory, the child will be removed to a safe location away from the lab site. The law enforcement officer will ensure that contact is made with Juvenile Intake, who will in turn contact the designated McPherson SRS officer (Director of Child Protection Services). In the event the child is contaminated, decontamination will occur immediately. If necessary, the child then shall receive immediate medical attention and be transported to the hospital for the appropriate testing. Juvenile Intake shall be notified for determination of temporary placement if there are no immediate appropriate family members available to take the child.

Interview – The investigating officers assigned to the case, and the McPherson County Drug Task Force if involved, will conduct the preliminary interviews of witnesses and parents at the scene whenever possible, and at their earliest opportunity if not at the scene. The emergency medical services officers may obtain further information from the child during decontamination. Juvenile Intake shall obtain as much information on the child and the child's history as possible,

## McPherson County DEC Protocol and MOU

and will contact law enforcement for further interview of the child if appropriate. The interview of the parents, witnesses, and child will have a three-prong purpose: possible criminal charges on the parents, possible child in need of care procedures on behalf of the child, and medical needs of the child.

Examination – If law enforcement personnel at the scene determine that the child has been exposed to any level of contamination, they shall make arrangements for transport of the child to the nearest Medical Center for further examination.

Fire/EMS will decontaminate the child at the scene prior to law enforcement transporting the child to nearest Medical Center. If it is determined at the scene that the child has not been exposed to any level of contamination, the child may then be referred to Juvenile Intake for determination of temporary placement or the nearest Medical Center for subsequent medical examination of the child.

Information gathered by Juvenile Intake and Assessment will be faxed to the McPherson SRS office as soon as the documents are completed.

The same reports will be provided to the McPherson County Attorney's Office.

**f. Social and Rehabilitation Services (SRS)**

SRS will provide law enforcement with any appropriate, relevant information received during the course of their Family Based Assessment.

These forms will include the CFS (Children and Family Services) 1000, 1001, 1002, and the YA 1010, which contains all narrative information.

All interviews, by both agencies, will be documented and provided to each other in an expedited manner.

The same reports will be provided to the McPherson County Attorney's Office.

## McPherson County DEC Protocol and MOU

In the event that children are in need of supplies and clothing such as when their clothes are potentially contaminated, and clothing needs to be replaced before they are transported to homes of relatives or protective custody, charity organizations will be sought for donations.

The designated point of contact for these agencies will be 911 dispatches as they have a listing for after hour's numbers.

As is dictated by SRS policy, all law enforcement protective custody placements of children are funded by SRS.

Exams related to assessments of abuse and neglect is typically funded by SRS/Medicaid or family service funds.

### **g. McPherson County Attorney**

The McPherson County Attorney's Office agrees to take all reasonable steps to:

1. Prosecute drug-endangered children cases.
2. Provide a victim witness advocate throughout the criminal legal process.
3. Assign an Assistant McPherson County Attorney to handle drug-endangered children cases. The assigned Assistant McPherson County Attorney will be given the opportunity to develop an expertise in drug-endangered children prosecutions through training and experience.
4. Attempt to recover lab costs incurred by the arresting agency, emergency medical services, and/or SRS for blood and urine analysis and medical evaluations of drug-endangered children when a suspect(s) is convicted of a DEC charge.

The McPherson County Attorney's office will review, prosecute, and file each of the DEC cases in the McPherson County area, which are determined to

## McPherson County DEC Protocol and MOU

demonstrate sufficient evidence for prosecution. The assigned prosecutor will handle all pre-trial motions when possible depending on the demands of the judicial system on the Attorney's Office.

### **9. Supporting Forms and Documents**

Each supporting agency will share documents according to current agency protocols and procedures. Forms and documents will be filled out and submitted at appropriate times to appropriate agencies as current policy dictates.

(The following list of protocols, checklists and forms are representative of those used in support and cooperation of this protocol at the individual agency level.)

Kansas Standard Offense Report and Narrative

Kansas Standard Arrest Report

Harvey/McPherson Counties Community Corrections Release Form

Harvey/McPherson Counties Community Corrections JIAS Release of Youth from Intake

Harvey/McPherson Counties Community Corrections Youth Service Medical Consent and Release Form

Kansas JIA System Intake and Assessment (JIA)

Problem-Oriented Screening Instrument for Teenagers (POSIT)

Social Service Case Activity Log (HIPAA) (YA-1010)

Social Service Intake Form (FACT SHEET CFS-1000)

Report/Request for Services (CFS-1001)

Summary of Results of Preliminary Inquiry (CFS-1001A)

Response Determination (CFS-1002)

### **10. Conclusion**

The McPherson County DEC Task Force has established the protocols in this document to cover the respective needs of Drug Endangered Children in McPherson County.

**FIRE DEPARTMENTS**

**Whereas**, McPherson County law Enforcement Agencies are the primary responders to, or discoverers of, drug-endangered children environments;

## McPherson County DEC Protocol and MOU

**Whereas**, drug-endangered children environments are defined as conditions of contamination or hazardous life style that results in abuse, life or health endangerment, or neglect perpetrated on a child as a result of illicit drug use, sales or manufacturing;

**Whereas**, contamination is defined: Contamination caused by the "cooking" and disposing of Meth hazardous chemicals inside a home endangering children by affecting: floors, walls, ceilings, working surfaces, furniture, carpeting, paneling, wallpaper, draperies, blinds, light fixtures, kitchen appliances, plumbing fixtures and drains, vent fans, ceiling fans, heating and air-conditioning vents, clothing, toys, food, etc. Contamination outside the home resulting from the dumping or burning of waste on or near soil, surface water, groundwater, sewer or septic systems;

**Whereas**, McPherson County Law Enforcement Agencies must grapple with an investigatory role dichotomy when encountering both illegal drugs and drug-endangered children (DEC);

**Whereas**, the McPherson County Attorney's Office has assigned an Assistant Attorney to prosecute cases involving clandestine drug labs and/or large-scale drug trafficking;

**Whereas**, drug-endangered children require the specific and immediate attention of a Department of Human Services Child Welfare Social Worker to ensure the child's safety and to mitigate the environmental trauma;

**Whereas**, sustainment of a safe and healthy environment for a drug-endangered child is achieved in part by the periodic and unannounced legal inspections of that environment;

**Whereas**, it is recognized that each law enforcement agency subscribing to this Agreement has varying levels of staffing and other resources available;

**Now, Therefore**, each subscribing agency retains the sole discretion to determine the ability of that agency to comply with the terms of this Agreement to the circumstances and resources existing at any given time.

**Now therefore**, in consideration of the mutual promises and agreements herein contained, the parties do mutually promise and agree as follows:

**The McPherson County Law Enforcement Agencies agree to take all reasonable steps to:**

1. Assign an investigator (or other personnel assigned to the drug-endangered children cases) to work in conjunction with investigators and/or patrol officers when a drug-

## McPherson County DEC Protocol and MOU

endangered environment is suspected or discovered. The investigator will be dispatched (whether on or off-duty) to the scene of a drug endangered child discovery when the endangerment involves a clandestine lab or significant drug trafficking crime in which a child endangerment violation is suspected.

2. In illegal drug related cases, ensure that the investigator interviews the victimized child(ren) and the investigator locates and collects all drug-related evidence. Horizons Mental Health Center should be utilized when appropriate and when possible for interviewing DEC victims who may have been physically or sexually abused.
3. When necessary, request a SRS caseworker to respond to the scene of a drug-endangered child investigation.
4. Brief the SRS caseworker assigned to the drug-endangered child investigation about all relevant matters pertaining to the endangerment allegation. When possible and as appropriate, the SRS caseworker should be involved in pre-service search warrant briefings in which drug-endangered children have been alleged. The SRS caseworker, however, will not be asked to enter the dwelling or other structure in which there is a clandestine drug laboratory.
5. Place any children found in a drug-endangered environment into protective custody and turn the child over to Juvenile Intake for a safe placement. An emergency protective order may be issued to ensure immediate, court-ordered protection of the child(ren), when a child is in immediate danger of abuse or abduction by a parent, relative, or someone known to them.
6. Ensure children who are taken into protective custody for drug exposure with no immediate need for medical care have a baseline assessment completed in a physician's office.
7. In accordance with the protocol those children with an immediate need for medical care following decontamination by Fire Service shall be transported by Emergency Medical Services to the nearest appropriate medical facility.
8. If necessary, obtain copies of medical history documents of children in SRS custody, from the assigned SRS caseworker.

## McPherson County DEC Protocol and MOU

9. Require the case investigator, or someone assigned by law enforcement, to contact the designated child "service facilitator" at the child's school of attendance and notify the service facilitator that the drug-endangered child unwittingly experienced a traumatic event, which may affect the child's behavior or performance at school. An agency may choose to negotiate this requirement with SRS by requesting the assigned caseworker to make the service facilitator notification.
10. Be responsive to all investigative follow-up requests by the McPherson County Attorney's Office within 72 hours of the request.
11. Promote educational endeavors within the agency and the community to enhance the successful identification and prosecution of all drug-endangered children cases.
12. Assist other McPherson County Law Enforcement Agencies in critical and/or severe DEC investigations in accordance with the McPherson County mutual aid agreement.
13. Dispatch an investigator (or other assigned personnel) to support and assist the McPherson County first responders on a DEC investigation being conducted or encountered by the first responders in the agency's jurisdiction.
14. Require officers to attend all Child In Need Of Care (CINC) and SRS Fair Hearings when their testimony is deemed necessary by the McPherson County Attorney's Office and/or SRS to support permanent or long-term child placement other than with the child's legal guardian.
15. Require the investigative officer for each drug-endangered child case to complete the DEC Evaluation Form and submit the original with the crime report to the McPherson County Attorney's Office and a copy to the case file. This form will be used for statistical data collection and made readily available to the agencies listed on this agreement upon their request.

### **The McPherson County Attorney's Office agrees to take all reasonable steps to:**

1. Prosecute drug-endangered children cases.
2. Provide child victim advocacy throughout the criminal legal process.
3. Assign an Assistant Attorney to handle drug-endangered children cases. The assigned Assistant Attorney will be given the opportunity to develop an expertise in drug-

## McPherson County DEC Protocol and MOU

endangered children prosecutions through training and experience. The assigned Assistant Attorney will, when possible, respond to the scene of the most serious cases of drug-endangered children.

4. Attempt to recover lab costs incurred by the arresting agency, emergency medical services, and/or SRS for blood and urine analysis and medical evaluations of drug-endangered children when a suspect(s) is convicted of a DEC charge.

### **The McPherson Social and Rehabilitation Services (SRS) agrees to take all reasonable steps**

#### **to:**

1. Coordinate services to drug-endangered children, including the sharing of information with law enforcement, after a search warrant service or DEC arrest has been made and law enforcement has established probable cause to suspect that a child has been abused or neglected
2. Work with law enforcement to ensure that a drug-endangered child is given a medical exam (wellness check) as soon as possible.
3. Attend training, when available, in the provision of services to substance-addicted parents and their children.
4. Attend joint drug-endangered children training sessions with law enforcement personnel when available.
5. There is a difference between children living in dangerous conditions that include clandestine labs and those living with parents who are addicted to a substance, including alcohol. For clandestine drug labs and illegal drug sales. SRS will, to the best of their ability:
  - a. Make every effort to have a SRS caseworkers attend law enforcement's pre-search warrant service briefing in suspected drug-endangered children cases, when requested.
  - b. Obtain the drug-endangered child's medical history, if available, and provide relevant information to law enforcement (or other assigned personnel) after a drug-endangered child has been taken into police protective custody.

## McPherson County DEC Protocol and MOU

- c. Help the child understand why they are being separated from his/her parents. The social worker assist the child in understanding the actions being taken on his/her behalf and what actions will be taken to help their parents.
- d. Upon release of the parents or caretakers, will work with other agency professional, including substance abuse and Probation/Parole, to ensure that the parents are mandated to attend and work meaningfully on their substance abuse issues.
- e. SRS will provide services to drug-endangered children, and their families, who remain in the custody of SRS.
- f. Any follow-up medical procedures, as ordered by a physician or other health care provider, of drug-endangered children in SRS custody will be included on SRS case plans.
- g. Recommend that drug-endangered children in SRS custody remain in SRS custody when parents are unwilling to work toward a meaningful recovery and when they place their children at a high risk of abuse, molestation, or deprivation, whether intentional or unintentional.
- h. As a last resort and in the DEC cases where private or Medicaid insurance is not available, SRS. will be responsible for medical costs incurred by drug-endangered children eligible for SRS services during a DEC investigation as outlined in the DEC Protocol. McPherson Memorial Hospital or Mercy Hospital will accept in full what Medicaid allows.

I agree with the above listed provisions and fully support the McPherson County Drug-Endangered Children Program.
